Evaluation Report

of

Streamline Roofing & Construction, Inc.

"150 SL"

Metal Roof Assembly

for

Florida Product Approval

 # FL 7207.3 R1

Florida Building Code 2007

Per Rule 9B-72

Method: **1 - D**

Category: **Roofing**

Sub - Category: **Metal Roofing**

Product:	*"150 SL" Roof Panel*
Material:	*Steel*
Panel Thickness:	*24 Gauge*
Panel Width(s):	*18" or 19.5"*
Support Type:	*Steel Purlins*

Prepared for:

Streamline Roofing & Construction, Inc.

P.O. Box 2378

Tallahassee, Florida 32316

Prepared by:

James L. Buckner, P.E.

C-BUCK Engineering

Specialty Structural Engineering

CBUCK, Inc. Florida Certificate of Authorization # 8064

Manufacturer:	**Streamline Roofing & Construction, Inc.**
Product Name:	**"150 SL"**
Product Category:	Roofing
Product Sub-Category	Metal Roofing
Compliance Method:	State Product Approval Rule 9B-72.070 (1) (d)
Panel Description:	"150 SL", Steel, Snap-Lock, Standing Seam Roof Panel attached to Steel Deck.
Panel Material / Standards:	Material**:** Steel Yield Strength: 40 ksi minimum Corrosion Resistance: Material shall comply with the Florida Building Code (FBC), 2007 Section 1507.4.3.
Panel Dimension(s)	Thickness: 24 gauge minimum Width: 18" or 19.5" Maximum (Net Coverage Width) Rib Height: 1-1/2"
Support Type:	**Steel Purlins** (Design of support system is not included in this evaluation)
Support Description:	• Steel Supports, 16 Gauge minimum • Yield Strength: 50 ksi minimum
Slope Range:	Minimum slope shall comply with FBC 2007, including Sections 1507.4.2, 1504.7 and in accordance with the Manufacturers recommendations.
Insulation:	**(Optional)** Any compressible blanket insulation maximum 6" thick before compression.
Fire Classification:	Fire Classification is outside the scope of Rule 9B-72, and is therefore not included in this evaluation. Additional approved substrates may be added for Fire Classification purposes.

CBUCK, Inc. Florida Certificate of Authorization # 8064

Attachment Component Description:

Roof Panel Clip / Bearing Clip
Material: Steel
Type: One-piece, fixed clip
Thickness: 20 Gauge minimum
Strength: 40 ksi minimum
Dimensions: 1-9/16" (tall) x 4" (long) x 1-1/16" (wide) horizontal leg
Corrosion Resistance: Per FBC Section 1506.7

Panel to Support Fasteners
Size: **#10 - 16** x 1" (3/4" minimum penetration through support)
Type: Low profile head Self-drilling screws
Corrosion Resistance: Per FBC Section 1507.6.6 and 1507.4.4
Standard: Per SAE J78-1979

Installation:

Streamline "150 SL" Roof Panel Attached to Steel Purlins:

1. Design Uplift Pressure:

METHOD 1: (18" Panel)

- 52.5 PSF (Safety Factor of 2:1)
@ maximum support spacing, 36" (based on 2 or more spans)

- **Purlin Spacing: 36" o.c.** maximum
  (along the length of the panel at each purlin and within 3" from all ends)
- **TWO** Fasteners per Clip
- Rib Interlock: Snap-Lock
  (Panel ribs shall be fully engaged to form an integral snap-lock.)

  Minimum fastener penetration or embedment into steel purlins, 3/4".

2. Design Uplift Pressure:

METHOD 2: (19.5" Panel)

- 37.5 PSF (Safety Factor of 2:1)
@ maximum support spacing, 36" (based on 2 or more spans)

- **Purlin Spacing: 36" o.c.** maximum
  (along the length of the panel at each purlin and within 3" from all ends)
- **TWO** Fasteners per Clip
- Rib Interlock: Snap-Lock
  (Panel ribs shall be fully engaged to form an integral snap-lock.)

  Minimum fastener penetration or embedment into steel purlins, 3/4".

METHODS 1 & 2:

Install the system in compliance with the attached installation method.
Refer to manufacturer's installation instructions as a supplemental guide for attachment.

Specialty Structural Engineering

CBUCK, Inc. Florida Certificate of Authorization # 8064

Quality Assurance: The manufacturer has demonstrated compliance of roof panel products in accordance with the Florida Building Code and Rule 9B-72.070 (3) for manufacturing under a quality assurance program audited by an approved quality assurance entity through **Underwriter's Laboratories, Inc.** (FBC Organization #: QUA 1743)

Performance Standards: The product described herein has demonstrated compliance with:

- **UL580-94 – *Test for Uplift Resistance of Roof Assemblies – with Revisions through February 1998.***

Code Compliance: The product described herein has demonstrated compliance with the Florida Building Code 2007, Section 1504.3.2

Evaluation Report Scope: This product evaluation is limited to compliance with the structural wind load requirements of the Florida Building Code, as related to Rule 9B-72.

System Limitations: The required design wind loads shall be determined for each project per FBC, 2007, Section 1609. Any rational analysis computations shall consider web crippling and fastener pullout/pullover per AISI Cold-Formed Steel specification and prepared by a qualified design professional as required by FBC 2007, Sections 104, 105, 106. The maximum fastener/clip and support spacing listed herein shall not be exceeded. Diaphragm and axial load capacity is outside the scope of this evaluation. This report does not evaluate use of this product in the High Velocity Hurricane Zone.
